

SCE&G has submitted a revised rates filing. SCE&G's request includes an increase in rates totaling \$74.161 million. This is in addition to the more than \$1 billion SCE&G has already been authorized to charge customers due to the construction of the Units.

Under SCE&G's proposed increase, residential customers served on Rate 8 (the most common residential rate) using 1,000 kWh would pay an average of \$148.11 per month. This is an increase of \$4.44 from the current average bill of \$143.67. Of the \$148.11, \$27.61 or 18.64% of the bill is attributable to the construction of the Units.
